"HAPPY NEW YEAR"

CAMPBELL, THE ORCHARD CITY OF THE FAMOUS SANTA CLARA VALLEY

Campbell INTER-URBAN Press

FOR THE BEST INTERESTS OF CAMPBELL AND COMMUNITY

VOL. 31, NO. 27. CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA. FRIDAY, JANUARY 1, 1926.

CITIES EMPLOYES TAX CUTS DENIED

AMENDMENT TO REVISE BILL IS DEFEATED

LOS ANGELES SOLON PRINCIPAL OPPONENT

Most All Debate Was in Favor of the Amendment, but When the Votes Were Counted, Support Was Not in Evidence.

Washington.—Congress Albert Johnson of Washington was defeated, 27 to 165, in his effort to amend the revenue bill so as to eliminate from federal taxation municipal employees of public utilities. Congress has been deluged with propaganda on this subject since its convening.

Congressman Johnson, on December 14, introduced his amendment, which would give public utility employees of municipalities the same exemption from the income tax as is now given other municipal employees. In introducing his amendment, he said:

"This amendment is offered as a new subdivision to the one defining gross income and is designed to take care of the employees in cities who are employees of municipal water works, municipal gas works, municipal light plants and the like of that.

"In a great many of the western cities and a number of eastern cities public utilities of that kind are owned entirely by the city. In fact, most water works are now municipally owned. The income tax regulations have provided that employees of this character are not subject to the exemptions granted to other muhicipal employees. This brings about an acute and awkward situation in many cities. For instance, in the city of Tacoma an engineer might be employed in the sewer department at a salary of $6,000 a year, we will say, and be subject to no federal tax, and let him be transferred by the city commissioners to work in the light department or in the water department and he then has to pay the federal tax."

Congressman Fredericks of Los Angeles was Johnson's principal opponent. He held up the present flood of propaganda as a solemn warning against what could be expected from civil employees of any branch of the government when their interests are affected. He said:

"I am opposed to this amendment. I have received, I suppose, two or three thousand letters, sent by public service employees in my district, asking me to so vote as to assist in exempting them from paying income taxes.

"The city of Los Angeles, part of which I have the honor to represent, owns and operates an electric lighting system which furnishes electric light for more than one-half of the city, and operating right alongside of that is a lighting system which is owned, say, by the Los Angeles Gas and Electric company. Here is one set of employees going out and reading meters, doing the same work as another set of employees are doing. One is taxed and the other is not.

"I say to you, gentlemen, this is one of the inequalities that is growing up in this country as the result of municipal ownership. When the time comes, if it ever does, when the railroads and the electric lighting plants and street railroads of our city are owned and operated by the government and their employees taken out from the payment of taxes and their salaries fixed by law you are going to have a very busy time dodging their propaganda."

U. S. URGED TO MAKE SUGAR FROM ARTICHOKES

Washington.—Aid of the federal government in commercial production of sugar from artichokes was urged by Senator Howell, Republican, of Nebraska, during a conference with President Coolidge. He said that experiments conducted by the bureau of standards have demonstrated that levulose, sweeter than sugar and more soluble than beet and cane sugar, can be made from artichokes.

To initiate commercial production, the president was told some assistance must be rendered by the government either through an appropriation for construction of a factory or through authority to the bureau of standards to supervise and help in the work.

Railroad Wage Parley Near

Chicago.—Negotiations between the "Big Four" train service brotherhoods and railroads of the country will be started here shortly after the first of the year, union officials here said. The unions are asking increases to restore the peak scale which was cut by a 12 per cent decrease in 1921 by order of the United States railroad labor board.

Golden State

Items of Interest to All

"It's a Privilege to Live in California."

The board of city trustees for Yreka, Siskiyou county, has decided to pave Oregon and Second streets with asphalt and concrete.

An architect is completing plans for a one and one-half story brick school building for the San Rafael school district, to be built in San Rafael.

Ground is broken for a $30,000 fraternity house for the Archanian fraternity at the College of the Pacific of Stockton, San Joaquin county.

The purchase by the Sterling Lumber company of its Oroville, Butte county, branch site in Meyers street from Roger S. Kitrick is announced there.

Governor Richardson a short time ago announced the reappointment of William R. Molony of Los Angeles as a member of the state board of medical examiners.

The Buena Vista schoolhouse, located about ten miles southwest of Bakersfield, Kern county, was destroyed by fire, entailing a loss of approximately $9,000.

Preliminary plans are being prepared for a 6-story steel frame hotel building for the Hotel Building corporation of Napa, Napa county. It will cost about $225,000.

Snow has fallen in the mountains north and east of Oroville, Butte county. At the summit a foot and a half fell. The temperature was recorded at 45 degrees.

County treasurers, meeting at Sacramento recently, elected F. W. Ross, treasurer of Alameda county, as president of their association to succeed John Hunt of Los Angeles.

The semi-annual teachers' examinations for Tulare county, just concluded at Visalia, left ten applicants by the wayside with only six successful even in completing the tests.

California has begun a concerted drive for construction at the Mare island navy yard of one of the three $15,000,000 scout cruisers recommended to congress by President Coolidge.

William Henry Wright, pioneer of Fort Bragg, Mendocino county, is dead after an illness of two days. Wright was born in Bangor, Maine, and was 84 years of age. He came to California in 1885.

The question of incorporating the town of Truckee, Nevada county, as a city of the sixth class will be voted on at a special election set for some time in February by the board of supervisors.

The number of voting precincts in Sacramento county has been increased from 195 to 240 by County Clerk Harry W. Hall, Sacramento, acting under authorization granted by the board of supervisors.

Inheritance taxes collected in Napa county for the past six months total $115,859.53. Of this sum more than $113,000 was the tax collected on the estate of the late Hugh Crawford, retired Napa capitalist.

The breaking of a 12-inch water main leading from the San Leandro reservoir to the city of Oakland flooded streets and basements in the outlying sections southeast of the city recently, causing much damage.

Plans are being prepared for a 2-story reinforced concrete hotel to be erected at Morgan Hill, Santa Clara county. There will be nineteen guest rooms, with 50 per cent baths. The building will cost about $29,000.

According to figures released from the office of Tax Collector Whitmore at Modesto, Stanislaus county, the first installment of the 1925-26 real estate and secured personal property tax, now delinquent, was collected almost in full.

An architect has been commissioned to prepare plans for a group of fireproof high school buildings for the Placer Union High School district. The buildings will be erected at Auburn, Placer county, and will cost about $250,000.

Plans have been completed for a 5-story reinforced concrete class A hotel building for Reseter brothers, of Watsonville, Santa Cruz county. It will contain six hundred guest rooms with 100 per cent baths and will cost approximately $250,000.

As a part of the Pacific Gas and Electric company's expansion program, E. W. Florence of Sacramento, division manager, has announced that an addition, including the installation of machinery, to the company's plant at Sixth and H streets will cost approximately $124,000.

Jes' Past Christmas

Jes' past Christmas, an' by cracky, I
Feel so blame natural, seems like I could fly,
Been so prim and proper for a long time past,
Seemed to me, by jinks, 'twas allus goin' to last!

Had to go to Sunday school, reg'lar, once a week
'Spected me on other days to be quietlike and meek;
Got so tired of sayin' yes'm, polite an with a smirk
'Stid of talkin' back to folks—say, 'twas worse'n work.

Couldn't sass my mother; had to mind my dad;
Didn't dast to lick a kid, an' oh, but it was bad!
Reckoned that I'd get some skates, a fur cap an' a sled,
An' figgered on a tippet with flaring ends of red.

I didn't get a dod darned thing I wanted, not a toy,
An' the Sunday school's reward to me was a motto
'bout a boy
Who always was so very good the whole year round
by gee:
That I knowed the printed card they sent was never meant
for me.

I ate so much on Christmas though, the doctor had to
take
Heroic measures with me; I had such a belly-ache;
I thought I'd die, but then I knew about jes' where
I stood
An' was sureo of bliss above, for I had been so good.
But now I'm feelin' better, an life s again a joy,
An with Christmas safely over, I'm once again—jes'
boy.

Edwin J. Parks

CONGRESS TO ACT ON NEW WAR MEASURE

Industrial Conscription Expected to Be Adopted as Definite Policy; Price Stabilization as Emergency Legislation Favored.

Washington.—Drafting of industry as well as man power in time of war may be established as a definite policy during the present congress.

President Coolidge, having declared himself in general terms for the proposition in addressing the annual convention of the American Legion at Omaha in October, sponsors of the pending Capper-Johnson bill are hopeful of obtaining favorable action on legislation which authorizes the president in war emergencies to stabilize prices and otherwise control industry.

Representative Royal Johnson, Republican, South Dakota, a war veteran, who has introduced a bill in the house for the American Legion, which has placed it at the head of its legislative program, said that he has been assured that hearings will be arranged before the house committee on military affairs within the next few weeks. Senator Capper of Kansas, who has submitted the bill in the senate, said he intends to arrange for early hearings before the senate military committee.

The house committee held extensive hearings on a similar bill in the last congress, the principal involved receiving the approval of officials of the war department, as well as of persons who figured prominently in the mobilization of the industries of the country during the World war.

"The important thing is to establish the principle of drafting industry as well as man power in time of war," said Johnson. "As a matter of fact the war department has done such excellent work in laying plans for the mobilization of industry in the event of another war emergency that this legislation probably would not be necessary. However, it is believed desirable that a declaration of this policy shall be on the statute books."

HEART DISEASE NOW IS DEADLIEST MALADY

Washington.—Heart diseases took a toll of 167,671 lives during 1924, causing nearly twice as many deaths as were attributed to any one of the other leading diseases, including pneumonia, tuberculosis, cancer or nephritis, the department of commerce reported.

A total of 1,753,990 deaths in the country's death registration area, comprising thirty-nine states, the District of Columbia and eighteen cities in non-registration states, established a death rate of 11.9 per 1,000 population, as compared with 12.3 in 1923, 11.8 in 1922 and 11.6 in 1921.

Advocates Free Mexico Ports

Chihuahua City, Mexico.—The governor of Tamaulipas has submitted to the Chihuahua chamber of deputies a measure which removes duty charges on goods brought to Juarez. It is proposed to make Juarez, Ojinaga and other Mexican border towns free ports.

NEW F & A M OFFICERS

Mondav evening the officers of Charity Lodge, F. and A. M., for the year 1926 were installed, Mr. T. M. Right, Inspector of the 51st District acting as installing officer assisted by F. W. Mitchell acting master of ceremonies.

The roster includes:
W. M.—L. T. Lenox.
S. W.—M. J. Bohnett.
J. W.—D. H. Cramer.
Sec.—T. A. Robinson.
Treas.—R. Alison.
Chaplain—Rev. W. E. Eckles.
S. D.—Robert Scholz.
J. D.—A. C. Anderson.

Following the installation an oyster supper was served in the banquet room.

NOTICE

The attention of members of the Country Woman's Club is called to the meeting of Jan. 18, the third Monday of the month when two very important matters of business will be voted upon. Every member is urged to be present nad take part in the business.

The dramatic section of the San Jose Woman s club under the direction of Mrs. C. A. Lohf, will present "The Kleptomaniac" a comedy in one act, at the meeting of the County Woman's Club on Monday.

Members and friends of both clubs are cordialy invited to attend this program, which will commence promptly at 3:30 p. m. in the community hall of the library building. The regular meeting will commence at 2:30 p. m.

TIME TO BUILD PARK ROAD TO BE EXTENDED

Sacramento.—Assurance that he will recommend a 2-year extension of the time alloted to California for completion of the grading of the new Merced canyon highway into Yosemite national park is contained in a letter from Stephen T. Mather, director of national parks, made public by Chairman Harvey M. Toy of the state highway commission.

In view of the fact that California is diligently prosecuting the work, Director Mather said, he will not advise the secretary of the interior to ask congress for legislation disposing of the Yosemite entrance paving funds, now held in trust.

These funds were obtained through the advance sales of automobile permits to enter the park, at $5 per car, the trust agreement providing that if California does not use the money for paving the Merced canyon highway, Congress shall dispose of the funds, which total about $112,000. The money can be used for paving only after the state completes grading operations.

SANTA CLARA COUNTY CONSOLIDATED MEET AT CUPERTINO, TUES.

Santa Clara County Consolidated will hold their regular meeting i the De Oro Club House, Cupertino at 12:15 p. m. on next Tuesday, January 5.

A 100% attendance from every civic organization in the county is expected as matters of vital importance will be discussed.

Wendell C. Thomas, president, is actively engaged on the new Santa Clara County folder and it is urged that every community in the county arrange to have their photographs and material sent in at the earliest possible date in order to facilitate the work which is now well under way and the date of its issue depends largely on the co-operation of the various communities in sending in their material. The matter of the county folder will be discussed at the meeting next Tuesday.

The Supervisors, who have shown a keen interest in the Consolidated will be present.

CHRISTMAS EVE PARTY

Mrs. Maria Scholz, one of Santa Clara county's prominent orchardists, again gathered her relatives and a few intimate friends under her hospitable roof on Santa Clara and Los Gatos road, for her annual Christmas eve celebration.

Twenty-seven guests assembled in the spacious dining room at 7 o'clock to enjoy the huge turkey and all the delicacies accompanying it.

Afterward, the guests led by the hostess, marched into the music room and the folding doors were thrown open, revealing a beautifully decorated and illuminated Christmas tree.

After the rendition on the piano of "Oh Tannenbaum" and "Holy Night" by Mrs. Scholz, the presents were distributed by Mr. Robert Scholz and Miss Anna Scholz, each one receiving a handsome gift from Mrs. Scholz, and several other presents drawn from the two lare bags left there by Santa Claus, himself.

The evening wound up with a midnight supper and a humorous speech from Mrs. Scholz. Christmas felicitations were exchanged and all left feeling the warmth and joy of the Christmas spirit radiated by the kindly and hospitable hostess.

Following is a list of the guests: Mr. and Mrs. Paul Scholz, and Mr. and Mrs. Frances Scholz, San Francisco; Mr. and Mrs. Val Straub, Mr. Paul Straub, Miss Alvina Straub, Mr. and Mrs. Lee Hutchins, Mr. Wayne Hutchins, Miss Leach Hutchins and Miss Helen McDonough of San Jose; Mr. and Mrs. Carl Scholz of Palo Alto; and Mr. and Mrs. A. Brydon and family, and Mr. Benj. Dalvit, Mrs. Laura E. Allen and Miss Anne M. Schulte of Campbell.

GRAM. P T A TUESDAY

The regular meeting of the Campbell Grammar school P. T. A. will be held in the kindergarten room Tuesday, Jan. 5th at 2:30. Mrs. Davidson, chairman of the Home department will be in charge of the program.

Those who have pledge cards for the Safety Education campaign are asked to be sure and bring them, as Mrs. Van Every is anxious get tbem all in.

The Foothill Federation meets Monday, Jan. 4th, at the Saratoga school. There will be an executive board meeting at 10 oclock but at 2 o'clock the meeting will be open and Mrs. Schuyler hopes there will be a large representation from Campbell as there is always something worth while at these meetings. Lunch will be served at the school at noon.

CELEBRATION COMMITTEES ANNOUNCED

Campbell's festive day, Feb. 22, will be a long remembered success if plans now under way are carried to completion. President S. N. Hedegard of the Chamber of Comerce announces the following committees for arrangements and already some have been busy.

Speaker:
T. A. Cutting, D. H. Cramer, W. H. Stray.

Program:
Miss Marie Mace, Mrs. R. H. Hyde, Dr. W. I. Merrill, C. B. Field, R. E. Noddin.

Finance:
L. S. Miller, Horace Lea, Mrs. M. A. Lanphear.

Publicity:
Mrs. E. R. Kennedy, J. D. Blaine, Mrs. J. F. Wehmeyer.

Decoration:
A. H. Wegel, Miss Hancie Naylar, Miss Mary Fablinger, Antone Ferro.

Hall and Refreshments:
I. R. Abbott, Mrs. S. N. Hedegard, Miss Rowena Farman.

B. O.C urry, one of Campbell's pioneer ranchers and businessmen has been appointed chairman of the day.

JOIN THE CHAMBER

Campbell Chamber of Commerce has resolved for 1926 to become a 100% organization with every service and fraternal body as well as all individuals as members. Pres. Helegard makes some suggestions for accomplishment for 1926 for members to be thinking over. Better co-operation: beautification by planting roses, building curbs and sidewalks and street paving: expansion of light and fire districts: electroliers for Campbell avenue: four inch water mains for insurance rate reduction: high pressure tanks and more fire hydrants to furnish beter protection to all district taxpayers: paving of Hamilton avenue, Central avenue, Los Gatos road and Campbell evenue extension and all streets where curbs and gutters have been put in: better and wider roads with rounded corners to safeguard transportation of school children: a site for a new high school: a steam laundry: a new hotel: more attractive store windaws.

Are you going to do your part to make Campbell a better home for yourselves and families? If so ask for a membership in the Campbell Chamber of Commerce.

PATRONS THANKED FOR THEIR ASSISTANCE

The annual Christmas rush at the local post office is well over and considering the amount of business, the work was most efficiently handled. The incentive of a coming holiday indoubtedly acted as a spur to many postal employees thereby moving both incoming and outgoing mail.

The Campbell office, by a campaign of education on the "mail early" idea which bore remarkable results, had dispatched quantities of Christmas mail long before the incoming rush. Most of Campbells patrons sent their packages early enough to arrive at their destinations before Christmas. This could not have been accomplished had it not been for the hearty co-operation of our friends. By it also they enabled the local force to more fully enjoy the holiday granted them by the Department. By this co-operation and a cheerful patience, the employees were better able to bear up under the nervous strain always attendant on the holiday rush. For all this and many other considerations and courtesies we wish to thank our host of patrons and wish them a joyous and prosperous New Year.

Radioactive Leather

A new way to give radium treatments of any prescribed strength very uniformly is to apply radioactive leather. Professor Taffarelli of Turin, Italy, incorporated radium salts in tanning hides and found that the prepared skins had acquired their curative power. It is thought that they combined into a uniform compound with probably the albumens of the skins.

As the amount of radium salts can be regulated, the strength of the leather can be made as desired. The leather has the advantage over many other means of radium treatments in that it is flexible and can be applied over a large area and to any part of the body surface.

Sphinx Needs Doctoring

The Sphinx has begun to crack, according to a report of the Egyptian antiquities department from Cairo. Its 175-foot back, hitherto unbent by carrying the weight of nearly 6,000 years, is to be strengthened.

The discovery of the break was made recently when the sand which is constantly encroaching on the Sphinx was cleared away. During the work a new tomb was discovered. The decoration of the interior of the tomb was extraordinary, but the sarcophagus had been rifled.

Heir Must Be American

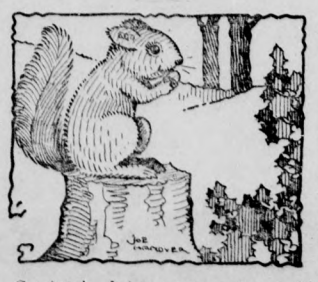
Andrew J. Onderdonk, a rich American youth who has been living in Vienna, must come back to the United States if he wants his share in his father's $600,000 estate. His father stipulated in the will that the son must make his home in this country if he is to receive his bequest, and added a statement denouncing "the spending in Europe of money made in the United States."

Use Handwriting Style Popularized by Edison

A handwriting that is almost the counterpart of the style invented by Thomas A. Edison, has been adopted by a New York city school. Letters are formed separately and no flourishes are used. The new style of hand writing came to this country from England and is the result of a study of old manuscripts, says a writer in McClure's Magazine. Edison invented the style he uses when he was a telegraph operator. He found that the style of writing taught in the schools was neither legible nor fast. So after much experimenting he copied the letterforms of type and discovered that "he could make better speed by not using flourishes or joining letters."

This writing which parallels that of Edison's has been taught in English schools for several years. It is a copy of the style used by monks during the Middle ages, when all books were written by hand, before the invention of printing. Experiments made with British and American children prove the success of the theory.

HE WAS HUNGRY



Squirrel—I hate to upset an old proverb, but it's a cinch no great oak will ever grow from this acorn.

The New Year

1925 1926

Here we are again, all of us. Another mile post in our journey across the planet we call Earth. Upon the west side we read in shadow-like letters Nineteen Hundred Twenty Five; upon the east side we find in characters of rightest hue the words, Nineteen Hundred Twenty Six. Some of us will make this jurney in less time than others by years or months or days. What a wonderful adventure it has been thus far. Oh, the joy of it all.

Yes, there were many ups and downs as we made some of the steeper climbs and there have been depressing moments as we have gone down a few of the mountain sides. But the beauty of the valleys that enchained our gaze as we stood upon the mountain peaks, has more than repaid us for the hardships we have endured in the past twelve months journey.

As we cast a look backward over the whole travelog of time, the present stands out in such bold relief that we are unable even to remember the earliest events of our advancing life.

We have sometime pondered upon this wonderful pilgrimage we are making through the Earth and have wondered just where in space the real starting of life's journey began. Perhaps it was in the sun or perchance it was in the central sun of all the suns of the universe, or in the bosom of the Father, the creator of all things. Who knows? Be that as it may, we are on the road. We may have already passed through Mercury and Mars, but at all events we are well on through the Earth.

"Where do we go from here," may be a pertinent question. Shall we go on from planet to planet accumulating experiences until we are gathered to our fathers in some grand reunion where our memories will be quickened and our experiences again recalled with the glory or the shadow of our own telling? Who knows! But hark! The bells in the campanile of time are ringing out the hour; it is twelve o'clock or 'low twelve,' marking the moment between the old and the new year.

If we are good sports we are standing at attention, facing the new year 1926. Then we will hear the great command "Forward, march!" Let every one remember he has an individual responsibility and a duty to perform.

First, as a good citizen he must obey the law of the land. No better test of one's Americanism can be found. Then he should resolve to be throughout the year, the big brother or the big sister to every other pilgrim on the way.

What a year of achievement may be ours if we forget not the injunction, "Keep your face toward the sunshine and the shadows will fall behind you."

However little or much we may have thought about the responsibilities of government or the need of human brotherhood, we will do well to remember at the outset of this new year Ninteen Hundred Twenty Six, that the ultimate history of the year will be written in terms of our own individual making. It is not what the government or the church fail to do as collective bodies that should draw our attention so much, but rather the progress I am determined to make for myself in matters of economic, social and spiritual well being.

Let us resolve to make the year 1926 the fullest and the best for our selves and for every body.

"The Local Dean"

BACK TO NORMAL

Another Yuletide is over. Once again we have lived throuh the rush and bustle of preparing for it, the excitement of presents and parcels and mails and Christmas cards; once more we have tackled with bravery and fortitude the honored fare of turkey and plum pudding, and yet have come through unscathed—well, perhaps not quite unscathed, for plum pudding is apt to play havoc with the most cast-iron digestion—but over that we will draw a veil—only just at present the thought we have another plum pudding in the pantry doesn't bring this to our mind. We feel as though we don't want to look one in the face for quite a long time. But we had a grand time! Eleven and a bit months to look forward to; and for all we know, every one of them to be betterer and betterer, as the office boy said.

GET YOUR AUTO LICENSE

That annual, easily forgettable need, next year's auto license, is upon the motorists of Campbell. For weeks officials have been calling public attention to this important matter. While there has been some response, thousands of motorists are apparently going to delay until the last day when their licenses cannot be issued "while you wait" will start to cuss.

Obviously the thing to do is for the motorists of the state to make their application now. There is indication that any respite will be [illegible] eliquent motorists after January 1. should be. Ample notice has been given. The auto division has been ready for a long time to issue the licenses. If part of the public chooses to ignore the opp[illegible]nity, they will get no sympathy if after first of the year they are arrested for carryng antiquated license plates.

Friend of President Van Buren Dies

Chicago.—Frank H. Cooney 83, a friend and fishing companion of President Martin Van Buren and founder of the old Detroit Mail, died at the home of his son here.

American Saves 1,000 Filipinos

Manila.—A heroic American, who with an ax cut through the walls of a moving picture theater in Cebu, saved the lives of hundreds of persons who had stampeded when the structure caught fire, trapping one thousand. Thirteen were killed and one hundred injured before the theater could be emptied. The fire started in the projection room and the flames spread rapidly, burning many before they could escape. The one exit became clogged and it was only through the heroism of the American that the panic stricken crowd was able to escape just before the roof and walls caved in.

Silk Companies in Big Merger

New York.—A $20,000,000 silk merger, uniting Belding Brothers & Co. and the Hemiuway Silk company, two of the oldest and largest silk thread ,manufacturers in the United States, was announced here recently.

Trees Need Mates

Some apple trees refuse to bear when planted alone. Dr. A. B. Stout, New York Botanical garden, says that the McIntosh, Rhode Island Greening, Delicious, Gravenstein, Red Gravenstein and Cortland are decidedly self-fruitless; that is, they will set but little fruit to their own pollen. It has also been discovered that certain varieties are not satisfactory cross-pollenizers for other varieties. For example, McIntosh pollen has been found to be highly fertile on Cortland.

FUTURE INDEPENDENCE IS A GOAL WITHIN REACH OF ALL

"In the family, as in the state, the best source of wealth is economy." — Cicero. This gem of common-sense is as true today as when it was uttered nearly 2000 years ago by that fiery old soldier, statesman and orator of ancient Rome.

The Mercantile Trust Company of California has several plans which are offered as a means of providing for your future security. We would be glad to explain to you the sound and practical features of the various systems which make Saving Accounts easy to open and certain to grow.

Mrs. J. D. Sawyer spent Christmas at Oakdale with her son, Roy and family.

Mrs. Ivy Rost has been confined to her home for several days this week with a severe attack of flu.

Mr. and Mrs. S. L. Hayes enjoyed their Christmas week-end with their daughter, Mrs. Price, and family at Sacramento.

Mr. and Mrs. C. H. Antrim and children of Fresno and Mr. and Mrs. G. B. Rodeck spent Christmas with Mrs. Lena Rodeck and Miss Mary Rodeck.

Wayne Davis accompanied by his mother, Mrs. Ethel Davis and brother Everett motored to Hollister to spend Christmas with Mr. and Mrs. Dwight Van Arsdell.

George Harlan and family came up from Lucia to spend Christmas with Mrs. Lucy Smith and family. Mr. Harlan returned home Monday but Mrs. Harlan will remain untill next week.

Dr. and Mrs. Husted of Modesto were here for Christmas and were accompanied home by Mrs. L. S. Miller. Mr. Miller ent over Wednesday and he and Mrs. Miller will remain over today.

A number of those who were on the sick list Christmas week are improving and able to be out again. Mrs. Frank Coupland and son, Mrs. T. L. Mendel, J. F. Duncan, Miss Mary Fabliner and Mrs. H. C. Smith.

A family party including Mr. and Mrs. Jack Scott of Bethany, Mrs. George Ray of Bethany, Mr. and Mrs. D. A. McQueen and children and Mrs. Hattie Dunham were gathered in the latter's home for Christmas.

Prof. and Mrs. I. R. Abbott and children have been enjoying a part of the Christmas vacation with relatives and friends at Lemore and Hanford. Mr. Abbott said he had not seen the sun since he went over the hills more than a week before.

The J. F. Duncan home was the scene of the annual gathering for Christmas. Mr. and Mrs. Easton Carter and children and Mr. and Mrs. F. Mendel and son, of Palo Alto and Mr. and Mrs. Edwin Parker, of Crockett joined the family here.

Misses Eva and Pearl Bohnett are here from Aromas visiting their brothers, Elver and Merlin for part of their holiday vacation.

The Walter Reichert family of Lower Lake spent part of the vacation days as guests at the Ralston Alison home.

F. H. Cutting has a remarkable picture of one of his choice paintings published in the Christmas number of the San Francisco News Letter. This was, with several others, shown recently at a Stanford Art exhibit and attracted much attention and favorable comment.

A number of Campbell ladies, representing the several Women's clubs of the community were guests of the Saratoga Foothill Club Tuesday afternoon. A delihtful program was given by the president and members of the American Jugo Slav Club of San Francisco.

In respnse to the call for prayer, issued by Mrs. Poole, National President of the W. C. T. U. a prayer meeting will be held in the parlors of the M. E. Church, on Thursday next, Jan. 7th, at 1:30 o'clock. Everybody interested in the work of the organization and law enforcement is cordially invited to attend the meeting.

Dr. C. E. Farman is Campbell's new dentist, occupying the rooms in the B. O. Curry block formerly held by Dr. Stallman. Dr. Farman comes highly recommended in his profession, having been a former manager of Painless Parker. He hopes to move from San Jose to Campbell as soon as he can make satisfactory arrangements.

Young Fruit Trees Are in Danger From Rodents

As soon as cold weather has destroyed the green vegetation upon which mice and rabbits feed, they will be looking elsewhere for succulent food. Young fruit trees are in danger, after these pests have once tasted the juicy bark. One rabbit can girdle a dozen trees in a day unless precautions are taken to prevent it. Rabbits attack trees that are from one to six years old; mice injure trees of any age. It is better and cheaper to protect the tree trunks this fall than to try to save girdled trees next spring by bridge grafting.

Trees may be protected either by painting the trunks with concentrated lime sulphur solution or by placing some protector about the trunk. Protectors may be made from poultry wire, building paper, or cornstalks. Patented protectors made of wood veneer or wire may be secured on the market. Eighteen-inch poultry wire with half-inch mesh is very satisfactory and has the advantage of serving for several years without being removed. Building paper, veneer and cornstalks serve equally well, but these should be removed in the spring since they afford shelter for wooly aphis, mealy bug and other injurious insects.

Mice will do very little damage where the above precautions are taken, but it is well to remove grass, weeds and rubbish from around the trees so they will not be encouraged to build nests close to the trunks.

Tennis balls at Smith's.

Charles Shumway is again bed with a flu attack.

Mr. and Mrs. Steven Sunquist were in Santa Rosa over Sunday visiting relatives.

Mr. and Mrs. Grattan spent the Christmas and the week-end with relatives in Los Angeles.

W. T. Denton, of Patterson is here for a visit with his sisters, Mrs. Effie Hubbell and Miss A. E. Denton.

Mr. and Mrs. Lloyd Selig went to Pasadena Wednesday to remain until Monday, the guest of Mr. Selig's mother.

Mrs. F. W. Mitchell entertained a few friends yesterday in honor of the birthday of her mother, Mrs. L. B. Sprecher.

Mr. and Mrs. J. D. Blaine, who accompanied Mr. and Mrs. Elgin Hurfburt home to Pacific Grove after Christmas have returned.

Walter Stanford is here with his family, having come to spend Christmas. The two little Stanford boys, who have been ill are much improved.

Mr. and Mrs. J. W. Brady of Arimo, Idaho, who were on their way home from southern California, spent Sunday in Campbell with Miss A. E. Denton.

Mr. and Mrs. Geogre Harlan and children of Lucia came up for Christmas with Mrs. Harlan's mother, Mrs. Lucy Smith. Mr. Harlan returned the first of the week.

Major M. Gosney, of Goddard, Kansas is in California and has visited his sister, Mrs. Ralph Halbrook of Campbell. He has also been in San Jose and at present is at Modesto.

Douglas Cutting had the misfortune to be in an autombile that fell foul of a motorcycle and as a result has an injured thumb and is using crutches, but is not seriously injured.

Mr. and Mrs. P. Rorke of Burlingame, Mr. and Mrs. Charles Burke and children, of Turlock, and Mrs. Frances Swane and son, Elwood, of Coalinga spent Christmas here with Miss Mary Fablinger. Mrs. Swane and Elwood remained for the New Year week.

Mr. and Mrs. O. P. Kimmel who were married in Indiana fifty years ago, will celebrate their golden anniversary, Wednesday, Jan. 6. From 2 to 4 o'clock that afternoon they will be at home to their many friends for the occasion, but request that presents be omitted.

Next Sunday morning at 9:45 the Bible School has its monthly Missionary program.

At the regular church service at 11:00 the celebration of the Lord's Supper will be observed.

Sunday evening at 7:30 the church wil have a "William Tyndale" program. This is the 400th anniversary of the publication of William Tyndale's Translation of the New Testament into English and we desire to pay tribute to the memory of this scholar and martyr and to recall the rich inheritance which the world has in the open Bible. The pastor wishes to ask any who may have old copies of the Bible to bring them to that service or notify him that he may call for them to use in connection with the service.

San Jose Y Golds defeated Campbell Quint Saturday evening in a very decisive manner. Our boys seemed rather dazed, only showing their metal at intervals. The final score 23 to 11 shows the relative play displayed. Our men have out-played this fast team on a former occasion. Captain Field has secured a place in the amateur's league for ur team which will make a good showing this season.

JOHN T. THOMPSOM

John Theodore Thompson who had been ill for several months passed away December 26th, in San Jose. Mr. Thompson and family have lived here for several years, where he was employed in the Sunsweet Packing Plant.

Mrs. Thompson died soon after coming to Campbell, but the father is survived by four children, a son, Alfred A. Thompson, and three daughters, Mrs. Edwin Mitchell, and Mary and Estelle Thompson.

The remains were sent to Dos Palos, where Mr. Thompson's father and two brothers are living and where he had been a member of the camp of Modern Woodmen of America.

The deceased was a native of Missouri, aged fifty-one years.

The sympathy of the community is extended to the bereaved children.

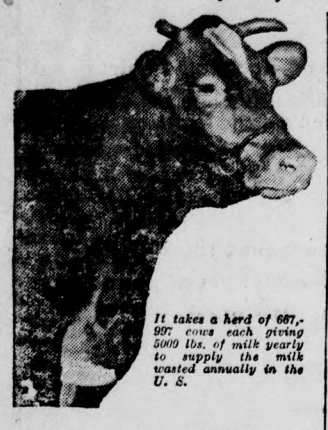
FOR SALE—Rabbits. Inquire of James S. Fay, 75 South First St. Campbell, Calif. 21 4

Spilt Milk Costs Uncle Sam $77,399,685.00 Annually



It takes a herd of 667,997 cows each giving 5000 lbs. of milk yearly to supply the milk wasted annually in the U. S.

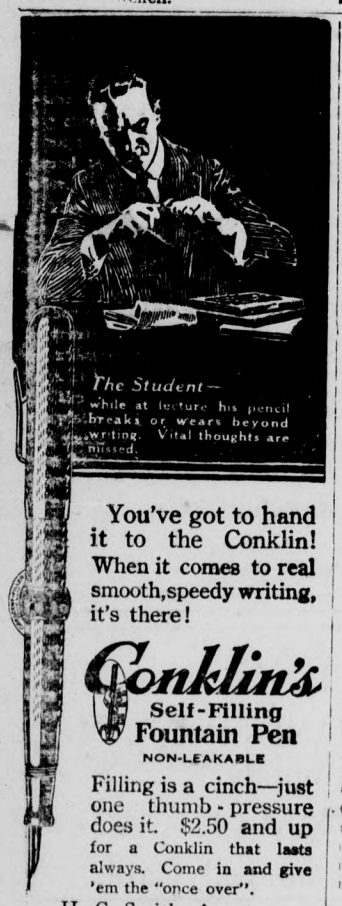
According to a schedule showing the division of dairy products, published by the United States Department of Agriculture, the annual cost of wasted milk in our nation would make a happy pay day for the army and navy and still leave an appropriation sufficient to build enough [illegible] planes to satisfy even the Mitchell.

The amount of milk spilt, soured, rejected and otherwise wasted annually, is 3,339,986,000 pounds. This at $2.25 per hundred would approximate annually the stupendous amount of $77,399,685.

However, a cheerful note rings through this tale of economic loss to a nation. The same report shows a 1924 increase of 108 pounds of milk per cow over 1923 production. Deducting this from the figure previously given, leaves a loss through waste of only $13,607,325, a mere bagatelle, compared with our national debt of more than twenty billions of dollars.

The increased yield per cow is due to heightened efficiency on the farm; and future years promise even greater increases.

Dairymen have discovered the futility of feeding non-paying members of their milk herds. They have learned that losses lurk in insanitary milk production. They have discovered the advantages that lie in swatting the bacteria that hide in unclean stables, unclipped, unbrushed flanks and udders of milk cows and unsterilized utensils. As time goes on, the unavoidable waste of milk will be more than offset by intelligent feeding, complete sanitation and more efficient herd management.



You've got to hand it to the Conklin! When it comes to real smooth, speedy writing, it's there!

Conklin's Self-Filling Fountain Pen
NON-LEAKABLE

Filling is a cinch—just one thumb-pressure does it. $2.50 and up for a Conklin that lasts always. Come in and give 'em the "once over".

H. C. Smith, Agent.

Holland's Liquor Question

Is Amsterdam drinking too much? That question is raised in connection with the publication of statistics showing that in 1924 2,990 warrants were issued against persons charged with public drunkenness (2,813 men and 177 women). The question whether it would be possible to stop the production of alcohol in Holland has been discussed for many years. After long study the commission appointed in 1919 has now suggested that the consumption of distilled liquors be kept within certain bounds, to be fixed every five years by a supervisory commission. The whole industry, not only the retail trade, may be placed under legal control. The supervisory commission would fix the quantities that could be manufactured and sold by each firm.

Niagara Built to Order

An artificial Niagara, in the Alps, at an altitude of more than 6,000 feet, was recently completed when the barrage of the River Barberine, in the canton of Valais, was opened with great ceremony by the Swiss authorities. The waterfall is slightly higher than the Niagara falls. The cost of the enterprise is nearly $12,500,000, but the outlay will be recovered within a few years, as the electrical power supplied by the dam will be amply sufficient to drive all the trains in Switzerland, and they will be consequently independent of foreign coal.

Food for Hawaiians

Breadfruit for the Hawaiian islands is expected to be one of the results of a ten months' scientific voyage recently completed by Gerrit P. Wilder of the Bernice P. Bishop museum of Honolulu. Mr. Wilder journeyed from island to island schooners, gathering planting stock of the many varieties of the breadfruit tree, which is reported to be in danger of extinction. In all, 88 new types were obtained, of which about 250 specimens, adapted to the climate of Hawaii, can be grown

Orchard Information

BARTLETT PEAR IS NOW THE STANDARD

The Bartlett was a good Christian pear before it came to America. In fact, that was its original name, but in France, however, "Bon Chretien." The Bartlett pear is now the standard of peardom, the universally used fruit for eating out of hand, but especially fine for culinary purposes and used from a market standpoint almost to the exclusion of other varieties. California is a great producing center, and cans for the world its supply of Bartletts, found in every big hotel around the globe.

The Bartlett, or, as it was then known, the "Bon Chretien," girdled the United States much as they now lay transcontinental telegraph and telephone cables. It started at each coast and met somewhere in the middle states. The original Bon Chretien pears, originals of the Bartletts, came in with the New England colonists, and now flourish over the eastern states and stretch westward. About the same time the Spanish friars in Mexico were growing Bon Chretien pears, they moved up into California, where they became a popular and staple diet in that wonder of fruit-growing communities, and moved eastward so that Bartlett pears moved the width of the country.

Further south other pears to some extent supplant the Bartlett, being better adapted to the climate, but for the eastern, western and middle states it is the pear par excellence. It became the parent of other pears which have attained favor, notably the Kieffer, which runs the Bartlett second in popular favor, this pear being originated in a cross between the Bartlett and the sand pear by Peter Kieffer of Pennsylvania.

When the term "pear shaped" is used, it refers to the typical contour of the Bartlett or old Bon Chretien pear, which is more regular in outline and quite different from other types of pear, which are more angular, longer necked, or rounder. The Bartlett is surpassed in flavor for eating out of hand by some other varieties, connoisseurs claim, but for general all-around usefulness it is still the oldest and the most popular.

CHEAPER IN LOTS

Lover—Willie, you saw me take a kiss from your sister—what will you take not to tell?

Willie—Fifty cents for a single kiss—but it's much cheaper if you take more.

Aged Father on Screen

Frank P. Carleton of Lathrop, Cal., enjoyed a pleasant surprise when he attended the moving pictures and saw on the screen his father, one hundred and two years old a resident of Whitefield, Maine, and a member of the Three-Quarter Century club. Cyrus Carleton was one of the three centenarians to receive gold medals from Governor Brewster, and the incident which [illegible] saw [illegible] on the screen

The Watch Party

By EMILY BURKS ADAMS

(©, Western Newspaper Union.)

THE churches of the little town were observing a New Year watch party, as had been their wont for many years. The town was not large enough to be classed a city, but large enough to have two churches, both of which had plenty of empty pews.

In this particular church the men had assembled to straighten out the finances which were badly in need of attention, correct the records, and be in readiness for the New Year. The women of the Aid society were meeting in the parsonage for a similar purpose, and to make ready the banquet which was to be a feature as soon as "Father Time" caused the passing of the Old Year.

Everything in readiness for the banquet, the women sat discussing the merits of their church and the demerits of the other, bringing out how much more good their church did, even though the other church had a larger membership.

"I just tell you, we can't lose any more of our members, though," said the secretary, as she glanced over her record.

"No," said Mrs. Binn, "the other church will take them all if it can. I have an idea Sister Ross is at their watch party now. I saw her with that cunning Mrs. Hopkins this afternoon."

"I'll bet she is," said Mrs. Brown.

"That's just where she is," said some one.

"Oh, well! she's so indifferent; she never comes anyway, only when some

"This Will Help Some," Handing the Secretary a Check.

thing special is on or when she wants to sing a solo. We wouldn't lose much," said Mrs. Broad.

The president of the society joined in by saying: "We would have had Brother Franklin's salary raised if every one had worked as hard as I have."

"I think it wrong to miss a single meeting," chimed in Mrs. Blake.

"So do I!" exclaimed others.

"She has no children and no excuse whatever," added the pastor's wife.

"I just wonder if she knows there's an indebtedness of a thousand dollars," said the treasurer.

"Well," added Mrs. Rand, who found fault with every one's giving, "she'd say she's too hard up, and wouldn't pay anyway. If we all cared as little, the church wouldn't last long. I think we'd better appoint a committee to see Sister Ross and remind her of her Christian duty."

A hurried step was heard—and in came the much gossiped-about Mrs. Ross, her face radiating a happy smile, which comes from sublime thoughts.

Sister Tactful said: "Oh! we've been discussing our New Year resolutions."

"Fine," said Mrs. Ross; "I wish I had the time to stay. I just ran over to say 'Happy New Year'—I must go right back."

A significant glance passed from one to another.

"I hear you are back on the pastor's salary. This will help some, since I haven't been able to help in other ways," she said, as she handed the secretary a check. She wished them a "Happy New Year," and departed.

"How much is it?" queried several. The secretary looked bewildered and said: "Surely it's a mistake! A check for one thousand dollars! I can't believe my eyes."

All began to express an opinion as to how she got the money.

"Oh, some of her relatives have died and left her the money," said Mrs. Binn, "and this is for show."

Mrs. Bliss, who had not spoken and sat quietly to one side, said: "Now, ladies, I know all about it; we can well be proud of Mrs. Ross; she's done more than all of us put together. She has worked day and night and has launched into literary fame. That check is the amount she received for a story she wrote about 'Town Gossipers.'"

The silence was not broken for some seconds.

"A still current runs deep," said the secretary. "I've thought there was something to her."

The bells began ringing—a good-by to the Old Year—a greeting to the New.

Each woman bowed as she made her New Year resolutions.

POULTRY

ROUNDWORMS CAUSE BIG POULTRY LOSS

Roundworms of poultry and intestinal parasites are directly or indirectly responsible for the greatest loss to poultry flocks. In many cases where birds become unthrifty, poor in flesh, and finally die, roundworm infestation, combined possibly with incorrect feeding methods appears to be the only tangible cause.

Outbreaks of infectious disease are more often found in flocks harboring roundworms than in worm-free flocks. This indicates that the parasites must be a factor in lowering the vitality and resistance of the birds to disease. In some states it is estimated that intestinal parasites are responsible for more than 50 per cent of poultry losses. A large share of these losses is directly attributed to roundworm infestation.

It has been reported by some poultry-packing establishments that between 75 and 80 per cent of the birds purchased are infested with some form of intestinal parasites. Such infested birds represent an economic loss not only to the poultry raiser, but also to the packer.

Nematodes or roundworms are cylindrical in shape and unsegmented. There are several species, four of which are quite common. These are the large roundworm, the ceca worm, the gapeworm, and the gizzard worm.

The symptoms caused by these four species of roundworms are so similar that it is not always possible to tell when fowls are infested with any particular type except in isolated cases when the infestation is with gapeworms. Young birds may become heavily infested in a relatively short time, but may not show it immediately.

Body Type in Fowls Is Quite Desirable Point

A bird of good body type must be deep and broad and show great length. She should be well developed in the breast and abdomen. Great length of back and keel is especially desirable. The bird should not be too loose feathered. This is generally shown by loose thigh feathers such as are shown by the Cochin. The under line should be fairly straight and long. The back should be long and horizontal (level). This, of course, varies with the breed. The Rhode Island Reds have the most level back, while the Leghorns have the most erect. The most desirable top line is the one which is the most horizontal.

The carriage of the bird should show a maximum amount of activity. The legs are generally placed behind the central portion of the body and are straight and wide apart.

A poor-producing hen generally stands erect. There are several outstanding types. These birds may be very shallow and cut away at the breast and abdomen. In the case of beefy individuals, the abdomen appears to be mainly made up of hard fat. Another type is commonly known as "bagging down." This is generally due to a short keel. Most birds with a deformed back are generally poor producers.—University of Illinois.

Seasonable Suggestions in Caring for Chickens

During the summer months many farmers allow their chickens to shift for themselves most of the time, but with the coming of winter it is necessary that poultry be fed. Consequently it is doubly important that this feed is not wasted. Here are some seasonable suggestions.

Cull close on old hens. Keep the best and sell the rest.

Well matured pullets make the best producers.

Sell surplus cockerels unfit for breeding purposes.

Be sure hens are free from lice and mites.

Don't overcrowd the fowls.

Outline a breeding system for the coming year.

Be sure to get full value when buying breeding stock.

Reconstruct the hen house during the fall. Damp hen houses are profit eaters.

During Heavy Production Water Is Needed by Hens

More than 65 per cent of the hen's egg is water. During heavy production the birds need very much more water than they do at any other time. Extra attention must be given to the drinking buckets during the winter months so that the hens will have a plentiful supply of fresh clean water available at all times. A drink the first thing in the morning is a customary habit of chickens and it is important that the birds should not be disappointed by finding a solid sheet of ice to prevent their satisfying their thirst. There are many forms of nonfreezing and heated founts on the market as well as heating devices for homemade watering arrangements that are adapted to winter use. In the absence of some of these a renewal of the drinking supply, three or four times a day, with water with the chill taken off, is recommended.
